### START ORCHESTRATING YOUR PRODUCTION

- **Reduce costs**  
Reduce costs by identifying worker absenteeism as well as machine performance related inefficiencies.
- **Lower your scrap rate**  
Lower your scrap rate by making sure all machine parameters are set up right and your workers are trained properly.
- **Increase process transparency**  
Increase process transparency by getting real time information for line balancing, order tracking, worker and machine performance monitoring.
- **Empower your workforce**  
Empower your workforce by showing best practice work instructions and media at the workplaces.
- **Improve your production processes**  
Improve your production processes by using built in advanced analytics and specially designed reports to deliver insights on point.
- **Keep implementation costs low**  
Keep implementation costs low and benefit from your existing IT infrastructure as QONDAC does not require any special network or server hardware devices to be used.
