Guided Working

The first sewing shopfloor control system with deep machine integration for highest productivity and smooth user experience. Save time and money by reacting immediately to changes in the workforce, machine breakdowns or production bottlenecks. Organize and control your shopfloor by creating product-specific workflows and roll out all information needed with the click of a button.

Your benefits

- Improve your planning: Assign workflows to orders and roll them out to the shopfloor with one click
- Improve Quality: Guide your operators
- Improve Productivity: Automatically adjust machine programs and parameters and show target/cycle times at workplaces
- Improve Availability: Make availability loss visible
- Three levels of integration: From manual workplaces to programmable sewing machines
